

Fractal Energy Unit (FMEU) vs BVOO Battery – Schematic Comparison

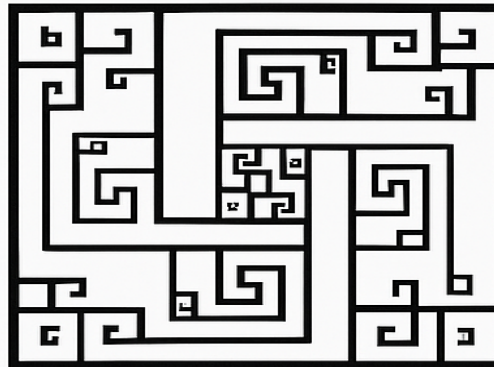

Component	FMEU (Fractalized Modular Energy Unit)	BVOO Battery
Core Structure	Fractal capacitor with recursive modular scaling	Linear stacked cells
Signal Integration	Integrated WiFi-responsive layer	None
Expansion Logic	Self-similar golden ratio recursion	Fixed volume capacity
Wireless Interaction	Ambient signal adaptive	Requires direct contact
Efficiency Growth	Exponential via fractal layers	Linear through chemical efficiency
Durability	50,000+ cycles (theoretical)	3,000–5,000 cycles
Frequency Coupling	Yes – harmonic and electromagnetic responsive	No – chemical only
